Section I: HR Trends and Future Outlook - Macro Perspectives and Leadership Insights

The rapid changes in both global and domestic labour markets are presenting new challenges for corporate HR strategies. This session provides a comprehensive macro-level overview of current trends, highlighting how Hungarian HR leaders are responding to constant transformation, what directions they see in the future of work, and which employee skills and competencies they consider most critical going forward.

Lunch break

Section II: Current Issues in the White-Collar World - Regulation, Transparency and Technology

The HR profession is preparing for a host of new expectations and regulatory changes. This session examines the current challenges of pay transparency and data collection practices, while also addressing how companies can prepare for the authorisation processes required when employing foreign workers. A key focus is the rise of AI: how it is reshaping HR processes, recruitment and workplace operations, and what ethical and practical issues it raises.
