

# Legaltech & Digital Compliance by Design 2024 program

## Registration

### Digital economy “YOU ARE HERE”

The digital economy raises new issues that pose new challenges for public authorities to assess; in particular, the use of innovative solutions has raised compliance requirements related to intellectual property to a new level. Rapidly changing market conditions are in themselves a driver for business adaptation, and the wave of EU and national legislation and regulation triggered by digital transformation requires real-time responses from business compliance systems.

What does compliance look like in the light of business expectations for innovative technologies, in particular artificial intelligence?

#### 08:55 - 09:00 Welcome and opening

Speaker:

**Kata Tóth**, Conference project leader, Portfolio

#### 09:00 - 09:30 The challenges of the digital economy from a public authority perspective

Speaker:

**dr. Péter Lábod**y, jogi, nemzetközi és innovációs ügyekért felelős elnökhelyettes, Szellemi Tulajdon Nemzeti Hivatala

#### 09:30 - 10:00 The challenges of the digital economy from a business compliance perspective

Speaker:

**dr. Magdolna Csömör**, Head of Regulatory, 4IG

## **10:00 - 10:35 Fireside chat with György Tilesch: Corporate AI as innovation and compliance: where's the contradiction here?**

Moderator: **dr. Andrea Megyeri**, Head of Innovation and Content Transformation, Wolters Kluwer Hungary Kft.

Speaker:

**dr. György Tilesch**, President, PHI INSTITUTE for Augmented Intelligence

## **10:35 - 10:50 netPORT for Digital Economy: Let's navigate together!**

Moderator: **dr. Judit Firniksz**, senior researcher, PPKE Versenyjogi Kutatóközpont, scientific advisor to Wolters Kluwer Hungary

Conversation participants:

**Balázs Cseh**, Associate Director, Technology Product Management - Legal&Regulatory, Wolters Kluwer Hungary Kft.

**dr. Andrea Megyeri**, Head of Innovation and Content Transformation, Wolters Kluwer Hungary Kft.

## **Coffee break & Networking**

### **Forced to take action - Compliance challenges: Webdesign and marketing technologies**

An imperative development for web designers is that as of June 28, 2025, the e-accessibility requirements will come into effect for the most common digital services and digital products. However, equal access to navigation and information in the online world does not only affect people with visual, hearing, intellectual, neurological or physical disabilities. An accessible web can also contribute to the overall competitiveness of a business, as many other groups of consumers can also benefit from a well-designed web interface. A well-designed and accessible web portal can be seen as a gateway in the digital economy, allowing users to enter easily and securely, thus increasing the operator's competitiveness.

In the digital space, new technologies have completely transformed the way consumers are communicated with in commerce – bringing to the fore completely new issues in marketing, such as ranking and dark patterns. Following the changes, the Commission plans to carry out an assessment of the adequacy of EU consumer regulations for fair treatment in the digital space (Digital Fairness) in 2024. This compliance check will review the adequacy of

existing EU rules on consumer protection issues such as online consumer vulnerability, dark patterns, personalisation practices, influencer marketing and subscription contracts.

### **11:20 - 12:00 Panel discussion: New expectations in web design from June 2025**

Moderator: **dr. Judit Firniksz**, senior researcher, PPKE Versenyjogi

Kutatóközpont, scientific advisor to Wolters Kluwer Hungary

Conversation participants:

**Gábor Kállai**, technológiai innovációért felelős igazgató, Shiwaforce

**dr. Péter Tóth**, Attorney-at-law, Legal Engineer, Associate at OPL gunnercooke

**dr. Dorottya Velegi**, megbízott szakmai vezető, Magyar Vakok és Gyengénlátók Országos Szövetsége, PhD hallgató, Pázmány Péter Katolikus Egyetem

### **12:00 - 12:40 Panel discussion: Martech & Digital Fairness - Innovative technologies in marketing**

Moderator: **Prof. dr. Klára Gellén**, Professor, Deputy Rector for Education, University of Szeged, Institute of Business Law

Conversation participants:

**dr. Lilla Cs. Tóth**, Attorney, Profession.hu Kft.

**dr. Márton Domokos**, Senior Counsel, CMS

**György Huszics**, ügyvezető igazgató, CRANE, CARBON.CRANE, DIMSZ - az Adatvezérelt Marketing Szövetség elnöke

## **Lunch break & Networking**

### **Forced to take action - Compliance challenges: Data economy and cybersecurity**

There is a lot of uncertainty surrounding B2B data flows due in no small part to new interpretations of data protection and copyright laws. It is also clear that the relationships in the data value chain must be sorted out, and new players, such as data brokers, are emerging. Therefore, it is crucial in the field of corporate data sharing and data trading to focus on the aspects that need to be considered for the legality of data trading transactions on the seller and/or buyer side. At the same time, the artificial intelligence value chain is built on top of the data value chain, relying on teaching data, test data, etc., and the problems spill over

here as well: the transaction cost-increasing effects of data selling and sharing due to uncertainty also appear here, and in many cases, they are a factor that impedes the data sharing transaction and the subsequent development and innovation.

NIS2 does not establish any expectations that a company should not, in its own interest, comply with. The overall change in the legal environment for cybersecurity shows that the risk of cyber-attacks is increasing; it is no longer a question of whether it will happen but when. The attack could affect not only large companies but also small and medium-sized enterprises less concerned with cyber defence. However, an important new element of NIS2 is that the companies concerned must protect not only their own systems but also the systems of their suppliers, adding new assessment criteria to the cybersecurity value chain.

### **13:30 - 13:45 Paperless office: legal and technological requirements**

Speaker:

**dr. Lilla Lovas**, Head of Legal, Microsec Software Engineering & Consulting Ltd.

### **13:45 - 14:25 Panel discussion: Data economy - The data is there, but how can it be legally monetised?**

Moderator: **dr. Judit Firniksz**, senior researcher, PPKE Versenyjogi Kutatóközpont, scientific advisor to Wolters Kluwer Hungary

Conversation participants:

**Péter Abszinger**, Azure Global Head, Azure Cloud Team

**Dr. Tamás Bereczki CISM, CRISC, CIPP/E.**, Lawyer, Partner, Provaris

**dr. Zsolt Zódi**, Legaltech project leader, Eötvös József Research Centre, National University of Public Service

### **14:25 - 15:05 Panel discussion: Changes in the cybersecurity regulatory environment**

Moderator: **Gábor Varga**, AI and innovation advisor

Conversation participants:

**dr. József Répás**, , Alverad - Magyar Kiberbiztonsági Klaszter

**dr. Zoltán Varga**, Executive General Manager - HR, Corporate Services, Legal & Compliance Affairs, Magyar Suzuki Zrt.

**dr. Csaba Vári CIPP/E, CIPM**, Lawyer, Baker McKenzie

## **15:05 - 15:25 The Artemis Protocol: Taming the Wilderness of AI, Learning and High Risk Technologies**

Speaker:

**Theodore Sebastian Boone**, Of Counsel, Dentons and Member of the Faculty, Corvinus University; former President American Chamber of Commerce in Hungary, Dentons Budapest and Corvinus University of Budapest School of Business

## **15:25 - 15:30 netPORT Pub Invitation**

Speaker:

**Katalin Kézdi**, Executive Director, Wolters Kluwer Hungary Ltd.

### **netPORT Pub: An Unconventional Encounter of Business, Technology, and Law, Alongside Finger-Food Closing Dinner**

NetPORT Pub gives professional networking a brand new form. Recognising that we can only navigate the sea of regulation together, we want to provide an unconventional opportunity for direct dialogue across professional disciplines, hoping to create a new tradition. In this way, the netPORT initiative aims to provide a port where professionals from a wide range of backgrounds can meet. Taking advantage of the surroundings of Béke Hotel, the closing event will have the informal atmosphere of a harbour pub, where sailors can meet after arrival and before departure to discuss their experiences and questions over a few tasty bites.

The experts of the sections will be waiting for participants at their regular tables to discuss the regulatory issues they are facing. Naturally, in addition to specific compliance issues, there will be a particular focus on how legal markets are being transformed by technology and technology-based regulation and what this means for competition and competitiveness in legal services. How to use legaltech tools, manage processes, and implement compliance requirements securely but efficiently, and what impact this has on the competitiveness of legal service providers in the broad sense.
