I. Section: The digital banking sector v. disruptors

Banks that have been lagging behind in the digital transition would overtake with one huge jump, those more developed are working to maintain their positions and introduce innovations, while fintech disruptors and bigtechs are building direct customer relations as they enter the ring against incumbents in more and more areas. Our first section will cover the digital development and strategy of the banking sector with several top digital executives.

II/A Section: Artificial intelligence and machine learning in the banking sector

It is now longer up to debate that AI-based solutions are playing an important role in improving banking services and the efficiency of these, and several Hungarian market players have launched their own AI projects. Artificial Intelligence can be useful for banks in numerous areas, from fraud prevention through handling customer interactions to risk management. This year, we are dedicating an entire section to this topic, with industry experts and IT managers from banks joining us.

Moderator: Ádám Turzó, Analyst, Portfolio

10:40 - 10:55 AI and credit risks after the COVID pandemic

Péter Rehus, Country Leader, IBM Magyarország

12:35 - 13:30 Lunch break

III/A Section: Payment trends

The payment market was the first area where revolutionary innovators have appeared, and the payment segment remains a key area of digitalisation and innovation to this day. It is no wonder that central banks are now seriously looking into the concept of digital central bank money in addition to instant payment systems and payment solutions featuring state-of-the-art UX. What are the most important ongoing changes in the segment? Find out in this section.

Moderator: Ádám Turzó, Analyst, Portfolio

Boris Martinovic, Public Policy Director, Mastercard

Zsolt Selmeczi-Kovács, CEO, GIRO

15:00 - 15:15 Coffee break

III/B Section: Open Banking

At first, banks feared it, then they made their way through regulatory compliance, and now they are regretting the time and money invested into PSD2 projects. However, service providers making use of the open banking concept are already with us, and several players entered the market in Hungary as well offering useful and working solutions, so open banking has made a perceptible impact on the market. We will discuss this with representatives of PSD2 service providers, banks and regulators.

Moderator: Márton Suppan, Founder, CEO, Peak Financial Services

13:30 - 13:45 Open banking overview

Speaker:

Tibor Berkes, Business Development Director, Mastercard Europe

13:45 - 13:55 Panel introduction

Speaker:
