

FM & Office 2018 program

8:30 - 8:55 Registration

Section I: The future of FM -Seeing today what will be the race tomorrow

Moderator: Gergely Ditróy, Head of Real Estate Division, Portfolio

08:55 - 09:00 Keynote speech: Gergely Ditróy, Head of Property Division, Portfolio

09:00 - 09:20 See the future opportunities, how to integrate into operation?

We make operations, but how, why, and how long does it take on technology development? Where is the need for innovations in operation and maintenance areas? How can we accept new technologies for customers, building users, and FM professionals? Is it a solution to the challenges of the labour market by spreading robotics and smart devices?

Speaker:

Csaba Szij, Deputy-CEO, B+N Referencia Zrt.

09:20 - 09:40 The future of the energy services on the office market

Speaker:

Dr. György Mitnyan, CEO, Főtv

09:40 - 09:55 Buildings of National Property - the Hungarian National Building Cadastre

The goal of the National Building Cadastre is to create a complex repository for the architectural documents and BIM models, create a unified methodology to survey the national buildings and create directives for facility and space management. We will introduce the web and BIM-based, 3D application which currently under development and will show the most important features: it is suitable to manage the most important information of the rooms and buildings, stores many of the energetic information and energy consume data in a database in a user-friendly way. We also plan to present the planned changes in the Hungarian building regulations regarding the ÁKÉK project.

Speaker:

Márton Deák, ÁKÉK Project Leader, Lechner Tudásközpont

09:55 - 10:40 Operators at the table: The most important questions about the future of sector and market

Section II: The latest revolution is already here - Everybody talks about it but nobody fully understands it

Believe it, PropTech will become increasingly important in the lives of realtors, just as evidently in other industries, where it is already the symbol of competitiveness, development, cost-effectiveness, quality service and, of course, profitability. "Smart upgrades" has already begun with smart homes and smart

cities, but what do we know about PropTech today? Where does the real estate market stand in technological developments?

Moderator: Gergely Ditróy, Head of Real Estate Division, Portfolio

11:00 - 11:50 Struggle for tenants - Roundtable of office developers and investors

Moderator: **Péter Futó**, ingatlanpiaci elemző, Portfolio Csoport

Conversation participants:

László Vas, Managing Director, LDR-RE Tanácsadó Kft.

Gábor Vörös, Managing Director, Head of CEE Real Estate Financing, UniCredit

11:50 - 12:05 Laser scanning to support construction projects and real estate management

Laser scanning is an even more widely used spatial data acquisition technology to obtain building geometry. Surveying entire buildings and complex surfaces especially those that cannot be captured by discrete points can be effectively supported by laser scanning, in many cases together with photogrammetry. The presentation provides and overview of supporting extensive areas (even cities) by airborne and mobile laser scanning, and of the potential of building survey by terrestrial laser scanning in comparison with conventional technologies.

Speaker:

Dr. Tamás Lovas, tanszékvezető, BME Építőmérnöki Kar

12:05 - 12:15 BIM directives - Lechner handbook to understand BIM

In order to maintain the development of the building industry it is unavoidable to apply more effectively the methodology and technology of the building information modeling. Since the readiness of the participants is divergent there is a need to create directives and guides besides the European and domestic standards which can provide integrated help for the users during the utilization of BIM. Our goal is to create a complex description about the new concepts, roles, the possible BIM uses and their realization as well.

Speaker:

Dr. Márk Zagorács, adjunktus, Pécsi Tudományegyetem, Műszaki és Informatikai Kar

13:00 - 14:00 Lunch Break

Section III: Why should the tenant choose us? -The opportunities of modern office buildings for getting and keeping tenants

The new direction of office market developments is no longer primarily determined by the needs of professional developers and consultants but the rather defined by the need of workers that tenants want to reach. But what are these? Effective operation is a basic requirement of the quality service providers but what are the trends that substantially influence the tenant's final decision?

Moderator: Gergely Ditróy, Head of Real Estate Division, Portfolio

14:00 - 14:15 The big picture of the office market-When, where, how many and what kind of office buildings are being built in Budapest?
